

## MASTER GAUGE CERTIFICATION KIT FOR TEST BENCHES

Model DCK-11502K

*On site calibration of flow meters and pressure gauges makes Business and process sense. No longer do you need to take the costly steps of suspending your operations while instruments are sent away, nor the time and man hours to remove and reinstall the instruments.*

Now A&P Hydraulics has made in-house calibration a practical proposition for users of its calibration master gauges kit utilizing the 4:1 ratio of allowable measurement tolerance for comparable calibration procedure and annual certification of gauges.

**Features:**

- Flow meter accuracy .2% certificate of certification traceable to NIST Standards
- Pressure Gauges Accuracy .05% certificate of certification traceable to NIST Standards

# MASTER GAUGE CERTIFICATION KIT FOR TEST BENCHES

**Standard Features:**

- High accuracy digital master flow meters .2% accuracy
- High accuracy digital master pressure gauges .05% accuracy
- Current certificate of certification traceable to NIST Standards for all Pressure Gauges and Flow Meters
- Heavy duty protective carrying case for transport and storage of master gauges
- Step by step instructions for gauge recalibration and quality control procedures (Hard copy and Disc)
- Certificate of Calibration forms (50 each)
- Inspection due placards for Gauge (50 each)
